Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Objections

Claim 1 is objected to because of the following informalities:

A. Applicant states in part e. "plan". It appears applicant may have intended to state -- plant--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Deposit of Biological Material

Since the seeds designated 'CIM-Jeevan' is essential to the claimed invention, it must be obtainable by a repeatable method set forth in the specification or otherwise be readily available

Detailed Action

to the public. If the plant is not so obtainable or available, the requirements of 35 U.S.C. 112 may be satisfied by a deposit of the plant. The specification does not disclose a repeatable process to obtain the plant and it is not apparent if the plant is readily available to the public. Thus, a deposit is required for enablement purposes. A deposit of 2500 seed of each of the claimed embodiments is considered sufficient to ensure public availability. If the deposit is made under the terms of the Budapest Treaty, then an affidavit or declaration by applicants, or a statement by an attorney of record over his or her signature and registration number, stating that the specific strain has been deposited under the Budapest Treaty and that the strain will be irrevocably and without restriction or condition released to the public upon the issuance of a patent, would satisfy the deposit requirement herein.

If the deposit has not been made under the Budapest Treaty, then in order to certify that the deposit meets the criteria set forth in 37 C.F.R. 1.801-1.809, applicants may provide assurance of compliance by an affidavit or declaration, or by a statement by an attorney of record over his or her signature and registration number, showing that

- (a) during the pendency of this application, access to the invention will be afforded to the Commissioner upon request;
- (b) all restrictions upon availability to the public will be irrevocably removed upon granting of the patent;
- (c) the deposit will be maintained in a public depository for a period of 30 years or 5

Detailed Action

years after the last request or for the effective life of the patent, whichever is longer;

- (d) a test of the viability of the biological material at the time of deposit (see 37 C.F.R. 1.807) and,
- (e) the deposit will be replaced if it should ever become inviable.

112 2nd

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected because the cultivar name 'CIM-Jeevan' does not define the plant because the name was arbitrarily chosen and can be changed. It is suggest Applicant include a Deposit number after the Deposit has been made. Appropriate correction is required.

Claim 1 is rejected as the recitation "p. the said plant is an annual herb," does not end in a period hence it is not understood whether applicant intended to include additional information or simply end the sentence. Appropriate correction is necessary. New matter must be avoided.

Detailed Action

Objection to the Specification

The disclosure is objected to because of the following informalities:

A. Page 2, line 15, Applicant states in part e. "plan". It appears applicant may have intended to state --plant--. Appropriate correction is required.

B. Page 3, line 6, is objected to as the recitation "p. the said plant is an annual herb," does not end in a period hence it is not understood whether applicant intended to include additional information or simply end the sentence. Appropriate correction is required. New matter must be avoided.

C. Page 3, lines 9-12, and page 5, lines 20-26 are objected to as the sequences need to be numbered with the appropriate SEQ. ID number (37 CFR 1.821 to 1.825). Appropriate correction is required.
